Hazardous Weather

Day 2-3 Weather Hazards

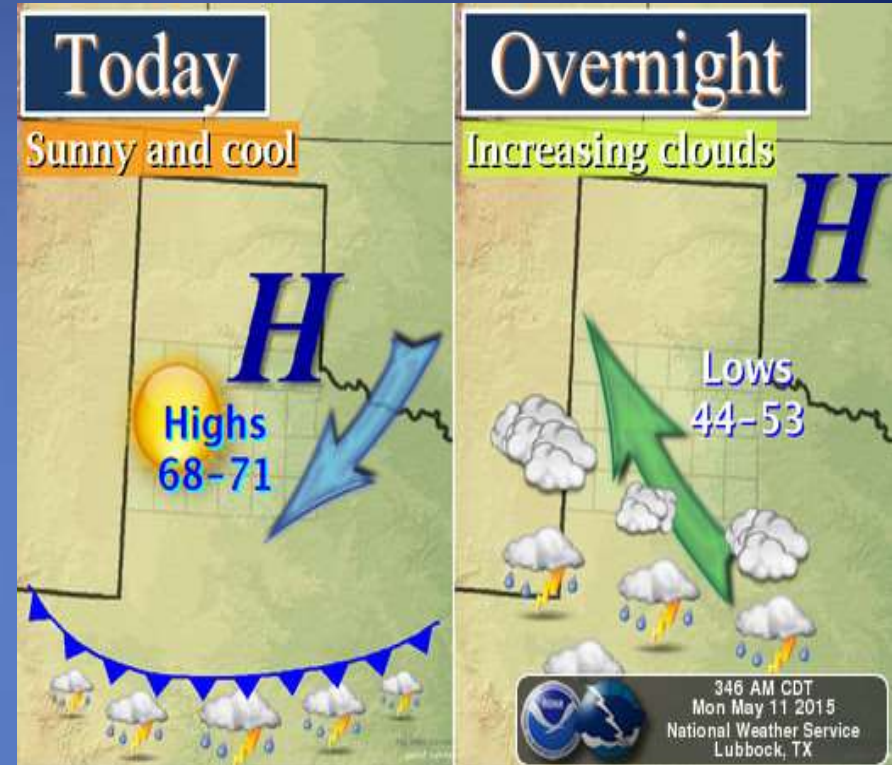

Valid: 0800 Tue - 0800 Thu

Hazardous Weather

An upper level storm system coming over the area will allow for rain and thunderstorms to develop over the next few days. Heavy rain will be possible with these storms. A Flash Flood Watch has been issued for Wednesday from 7 am to 7 pm CDT for central and eastern portions of the Permian Basin.

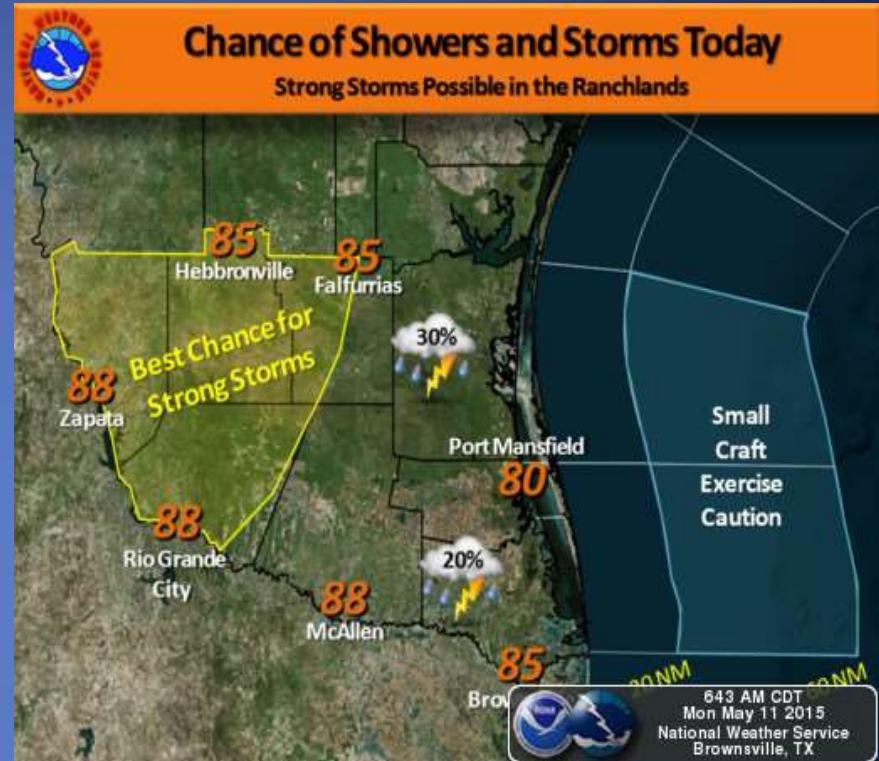

Cool high pressure today will push east tonight ahead of increasing cloud cover. These clouds will grow into some thunderstorms and showers by daybreak on Tuesday.

National Weather Service
Shreveport, LA

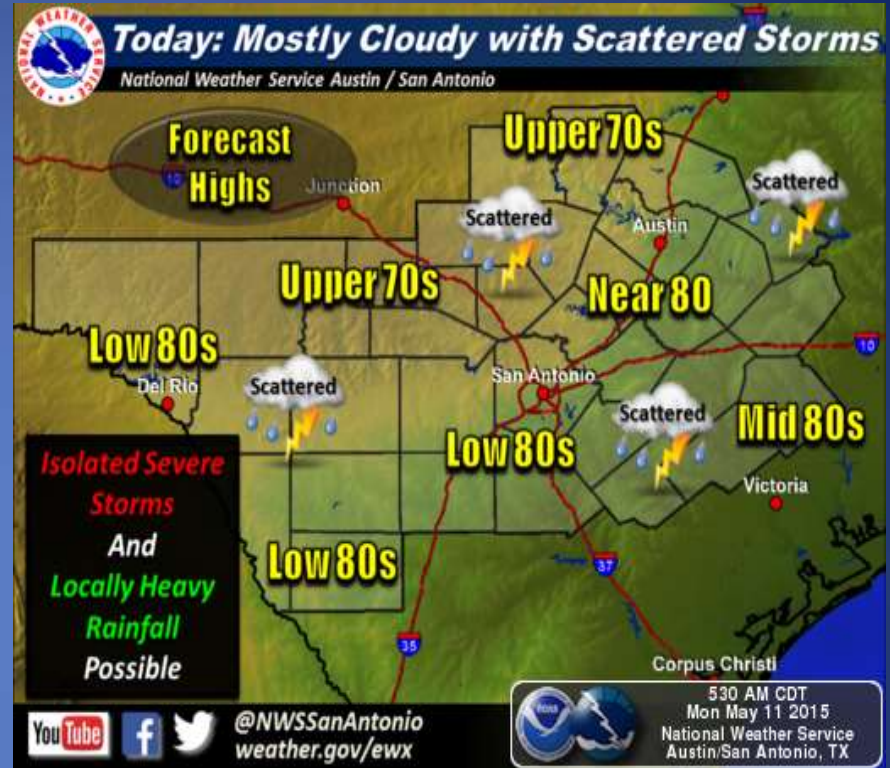

With an approaching cold front from the north and upper level disturbances, we are under the risk for showers and thunderstorms today, with the best chance being late evening and tonight. The best chance for a few storms to become strong to severe will be in the Upper Valley and Ranchlands. Otherwise, skies will be mostly cloudy with temperatures in the middle to upper 80s.

Hazardous Weather

Slight Risk for Severe Storms Across South Texas

Chances for showers and thunderstorms will increase today as a slow moving cold front approaches South Texas. Some thunderstorms could be strong to severe. Primary hazards from any severe storm will be damaging winds and large hail. Locally heavy rainfall will be possible as well.

Scattered to Widespread thunderstorms are expected today throughout South Central Texas. An isolated Severe Storm or two along with locally heavy rainfall will be possible. Highs will be in the upper 70s and low 80s.

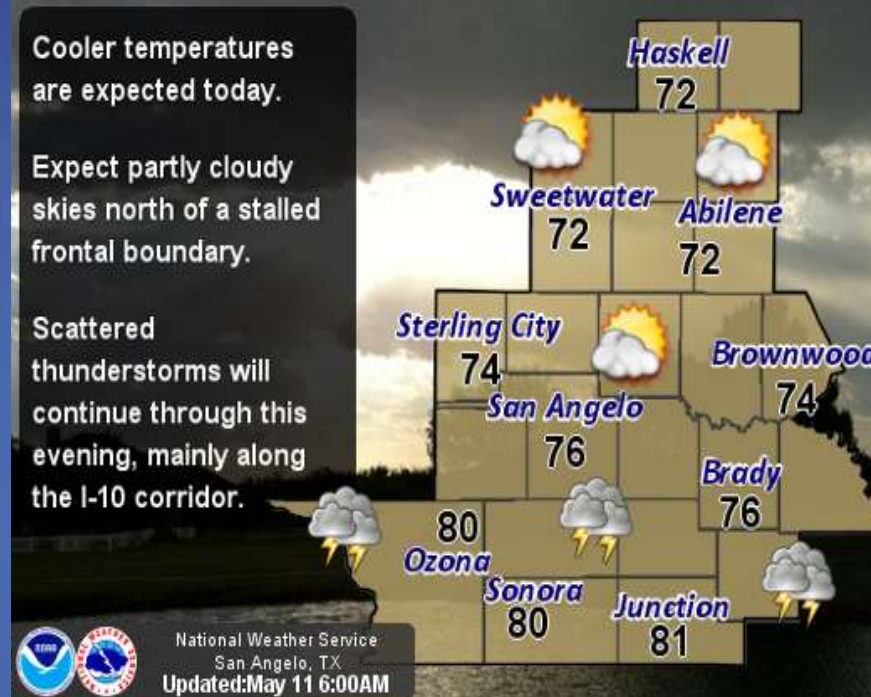

Hazardous Weather

Cooler Today

Cooler temperatures are expected today.

Expect partly cloudy skies north of a stalled frontal boundary.

Scattered thunderstorms will continue through this evening, mainly along the I-10 corridor.

Cooler temperatures will be felt across West Central Texas today. Highs will range from the lower 70s across the Big Country to near 80 degrees along Interstate 10. Scattered thunderstorms will be possible today, mainly south of a San Angelo to Brownwood line. A few storms may become severe, with the main threat area long the Interstate 10 corridor.
